PREVENTIVE DRUG BENEFIT PROGRAM

Employee Guide

Effective January 1, 2020

INTRODUCTION

Blue Cross and Blue Shield of Illinois (BCBSIL) administers the preventive drug benefit for your group's high deductible health plan ("HDHP"), which has been designed for use with Health Savings Accounts ("HSAs"). The preventive drug benefit program includes categories of prescription drugs that are frequently used for preventive purposes. If your doctor has prescribed any of them to you for preventive purposes, then you and your HSA-eligible dependents may have coverage before satisfying your HDHP deductible.

Below and on the following pages is a guide listing some examples of drugs that are commonly prescribed for preventive purposes. Coverage of all medications is still subject to your HDHP limitations, exclusions and out-of-pocket requirements (for example, your prescription drug payment levels). Coverage of some medications or drug products may be covered under your medical benefit.

IMPORTANT REMINDER: These drugs could also at times be prescribed for treatment purposes. As a result, the listing of a drug in the Guide does not mean that it will be covered by your particular benefit plan before your HDHP deductible is satisfied. If your doctor has prescribed a listed drug for treatment purposes (and not preventive purposes) then your plan does not provide coverage for that drug before your HDHP deductible is satisfied.

As each individual's medical circumstances are different, and because proper classification is necessary for you to ensure you are complying with your HDHP tax obligations, it is important for you to confirm the purpose of the prescription with your doctor. Please call the number on the back of your member ID card when your doctor confirms to you that he or she prescribed one of the listed drugs for treatment purposes so your claims can be processed correctly. **Unless you provide us with this information, claims for the drugs listed in the Guide will be processed as "preventive," and you or your doctor may be asked by us to provide medical records showing that the drug you're taking is being used for prevention. Remember, if you improperly classify the drug, it may result in adverse tax consequences so please be sure to take the confirming step to properly classify your claim.**

REMEMBER: Just because a drug is on the list, doesn't always mean it is covered.

FOLLOW THESE STEPS:

1. Find your drug in the Guide.
2. Talk to your doctor about whether your drug is in fact being prescribed for preventive purposes (and not treatment purposes).
3. If prescribed for treatment purposes, call the number on the back of your ID card to let us know.
4. If prescribed for preventive purposes, there is no need to call.

This Guide lists some, but not all, examples of drugs that are commonly prescribed for preventive purposes. It is being provided to you as a resource to help you in managing your prescription drug benefits under your employer's HDHP.

This list does not include all drugs that may be prescribed as preventive. It will be reviewed periodically and is subject to change. Coverage of all medications is still subject to your HDHP limitations, exclusions and out-of-pocket requirements (for example, your prescription drug payment levels). Coverage of some medications or drug products may be covered under your medical benefit. Please verify with your plan if there are any additional requirements before a drug may be covered.

It is important to note, for the reasons described in the Introduction to this Guide, that the listing of a drug in the Guide does not mean that it will be covered by your particular benefit plan before your HDHP deductible is satisfied. Please follow the steps outlined in the Introduction to ensure you are properly directing the processing of your claims.

The preventive drug program currently includes prescription drugs in the following categories:

- Anticoagulants/antiplatelets
- Bowel preparation
- Breast cancer primary prevention
- Contraceptives
- Diabetes medications
- Diabetic supplies
- Fluoride
- High blood pressure
- High cholesterol
- Osteoporosis
- Respiratory
- Tobacco cessation
- Vaccines

The drugs in each category are listed alphabetically on the following pages.

Generic drugs are listed in **bold**.

Brand drugs are listed in all CAPITAL letters.

Some strengths and/or formulations may not be covered.

Brand names in parenthesis are listed for reference and are not covered under the benefit.

 This drug/drug category may also be included under the Affordable Care Act (ACA) coverage of preventive services. These products have limited or \$0 member cost-sharing (copay or co-insurance), when meeting the conditions as outlined under the regulation and when you use a pharmacy or doctor in your health plan's network. Not all products covered under ACA are shown. Coverage can vary based on your benefit plan and/or prescription drug list. Call the number on your member ID card if you have any questions and to find out what you may pay.

Please be reminded that Health Savings Accounts (HSAs) have tax and legal ramifications. Blue Cross and Blue Shield of Illinois does not provide legal or tax advice, and nothing herein should be construed as legal or tax advice. These materials, and any tax-related statements in them, are not intended or written to be used, and cannot be used or relied on, for the purpose of avoiding tax penalties. Tax-related statements, if any, may have been written in connection with the promotion or marketing of the transaction(s) or matter(s) addressed by these materials. You should seek advice based on your particular circumstances from an independent tax advisor regarding the tax consequences of specific health insurance plans or products.
